DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 9/29/06 has been entered.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Meyers et al. (US 4,287,704).

Meyers discloses manufacturing packets comprising applying adhesive to a portion of each blank by nozzle 34 (figure 10); placing the plurality of folded blanks in at least one stack (figure 21) (into a magazine of a cartoner); removing one blank from a stack A and folding/assembling the packet.

Regarding claims 2-5, it is inherent that before the final closure of the container (step of claim 2) in the cartoner that first through fourth tabs will be moved inwards towards

the opening after inserting a product; see figures 9 and 20 (note also locking flap in figure 9).

Response to Arguments

4. Applicant's arguments with respect to Meyers is not persuasive. The discussion differentiating the sequencing between Meyers and applicant's claimed invention is not understood; see pages 5-6 of Remarks in the amendment of 9/29/06. Meyers discloses erecting the cartons in a "prebreaker" and subsequently breaks them down, inserts them into the magazine, pulls them out of the magazine with vacuum draw down cups 294, and erects them for filling; see column 12 lines 36-42 and lines 63-68.
